- Conducts assessments to determine the educational needs of clients or institutions.

### Gandhi Restaurant Singapore: 2020

Front House operations

- Taking and serving food and drink orders from customers.
- Handling the online delivery app orders

## PROJECTS

**BRDLUX – Second-Hand Car Sales Web Application:** A user-friendly web application for buying and selling pre-owned cars. Users can search for vehicles based on various filters and directly contact sellers through the platform. Built using Python and the Django framework, the application features smooth page transitions and engaging animations to enhance user experience.

**Instagram-Inspired Social Media Platform:** A full-stack social media application modeled after Instagram, featuring user authentication, profile creation, and real-time interaction. Users can follow and unfollow others, send direct messages, post images and videos, like and comment on posts, like comments, and block users. The platform emphasizes user engagement and provides a familiar, intuitive interface similar to popular social networking apps.

## TECHNICAL SKILLS

- Django
- Python
- Html-5
- CSS
- Git
- Javascript
